

# pkexec no funciona [Solución]

Si te falla el PKEXEC y te sale un mensaje del tipo:

```
==== AUTHENTICATING FOR org.freedesktop.policykit.exec ====  
Authentication is needed to run `/usr/bin/vi' as the super user  
Authenticating as: amide,,, (amide)  
Password:  
  
polkit-agent-helper-1: error response to PolicyKit daemon:  
GDBus.Error:org.freedesktop.PolicyKit1.Error.Failed: No session for cookie
```

Tienes que ejecutar el siguiente comando para arreglarlo:

```
/usr/lib/policykit-1-gnome/polkit-gnome-authentication-agent-1 &
```
